Are you in search of an amazing place to go on holiday? Have you ever considered Iceland? 'Professional traveller,' Jake Heath has just returned from a fascinating trip to the historic second largest island in Europe and tells our readers about this impressive place.

When I got to Iceland, I was immediately struck by the unique natural beauty and absence of pollution. These things make the island stand out from other places, as it is truly untouched by those evils that have spoilt much of the rest of the world. One of the reasons that Iceland is such an amazing place is that about half of the island is made up of volcanoes and a mountainous lava desert. Who would imagine that a place with a name like 'Iceland' would feature landscape like that? Of course, Iceland also has several glaciers, or 'frozen rivers', and many fjords. Plus, it has more land covered by glaciers than anywhere else in Europe. So, when you think of it, the name Iceland does make sense after all!

When I was told that my trip to Iceland had been scheduled for the first week in January, what I expected was extreme cold. However, I was in for a surprise. The climate of Iceland is milder in winter than most people think. In Reykjavik, the average temperature in January is 5°C and although winds and gales are common in winter, thunderstorms are extremely rare. As it turned out, the weather was no obstacle to my expeditions to some fascinating places.

I have been travelling around the world for more than a quarter of a century, and I have been to several breathtaking natural wonders. Very few of them can be compared to the Great Geyser in Haukadalur in South Iceland. This geyser, or hot spouting spring, spouts hot water to a height of 60 metres, which is a truly remarkable and incredible sight! Another extraordinary sight I visited was the famous volcano of Hekla, one of the 200 active volcanoes in the country. During the Middle Ages it was believed to be the home of the damned. Its first recorded eruption was in AD 1104 and since then there has been a series of eruptions, some of which were gentle while others caused significant damage to the nearby countryside.

In addition to volcanic activity, Iceland is richer in hot springs and high temperature geothermal activity than any other country in the world! The inhabitants of Iceland are very creative and technologically advanced, and they have managed to harness the energy of their natural resources. They have built a power station which collects and uses the natural geothermal heat produced under the ground to meet the energy needs of the island. The Icelanders have also used geothermal heat for open-air swimming pools and spas, where people can enjoy a dip in the relaxing thermal water. Plus, these thermal spas are famous for their numerous health benefits. So, who wouldn't want to indulge in a stay at one of them?

**57** – Naturally, I had made a reservation at one of the most popular spas, and *it* was an experience I will never forget!

What I found most difficult to get used to was the lack of daylight. You see in Iceland for two to three months of the year, there is continuous daylight, but from November to January there is an intensely dark period with only 2 to 3 hours of daylight per day. However, the breathtaking experience of seeing the Aurora Borealis, or Northern Lights, made up for this state of almost total darkness. This is a spectacular sight which you can admire especially well in Iceland on cold, clear nights from September to March. The sky lights up with many different colours caused by the interaction of particles from the sun with the earth's magnetic field.

About four fifths of the population of Iceland live near the capital, Reykjavik, and the surrounding coastal areas. The Icelanders are not characterised only by high standards of living and a high level of technology and education. Their culture is very rich with strong traditions in music, literature and art. Reykjavik has an annual cultural event every third week in August which attracts about 100,000 people from all over the world. This event offers numerous exciting types of entertainment, such as art

exhibitions, music concerts, fairs, fireworks displays and traditional Icelandic folk dances. Of course, throughout the year visitors can participate in a variety of fun activities. I myself particularly enjoyed riding on a famous Icelandic pony, river rafting, whale watching and hiking on glaciers.

Iceland is a land of contrasts and quite a unique place not only in terms of geographical features. The wild Icelandic landscape invites the adventurous traveller, and the Icelandic people set an example with their environmentally-friendly policies.
